

# 17TH MARCH SCIENCE UPDATE

**This essential course will enable you to deliver an engaging, dynamic, purposeful, and truly awe inspiring science curriculum.**

Welcome to the Impetus Spring update in science. This session will help you build, host and sustain a community network of inspiring teachers who are passionate about primary science and the way it is delivered. We will demonstrate outstanding teaching practice, support your development and growth and share best practice.

As Science Leads, this course will ensure you:

- stay abreast of latest Government guidance and updates;
- Have a comprehensive understanding of the offer of remote learning and its delivery, delivery and offer of remote learning in science
- Develop the ability to deliver in-depth reviews on the progression of working scientifically including how to systemically develop and monitor.
- Review how to further develop your subject leader role including: intent, implementation and impact from autumn and how this is supporting your schools vision.
